Open question	Controlled comparison		Evidence to record
Perception or execution	Model judgment	vs. Numerical tool	Numerical error Execution cost
Memory under change	**Release v_1** Prior evidence	→ **Release v_2** Revised values	Revalidation Updated conclusions
Procedure transfer	Seen setting	vs. Held-out setting	Held-out performance Reuse success
Evidence sensitivity	Evidence present	vs. Evidence removed	Response to removal Grounded claims
Prediction to decision	Forecast	→ Inventory action	Forecast error Action utility

Match the backbone, information boundary and resource budget
