Question and numerical input

In which part does the anomaly occur?

Head, middle, or end?

Illustrative sequence

Iterative analysis

Reasoner

Choose the next analytical action

Detect

Anomaly presence and interval

Evidence log

Anomaly found in the middle

Evidence gate and answer

Required evidence

- has_anomaly = true
- anomaly_segment = middle

Both requirements covered

Answer: middle

Missing evidence: select another action

Native series → **Tool + arguments** → **Structured observation** → **Answer evidence**
