
Generalist LLM
Task + context + observations
Select operation and parameters
Use the returned evidence
Operation + parameters
Numerical workspace
Full-precision series
Time
Channel 1
Channel 2
t_1
$x_{1,1}$
$x_{1,2}$
t_2
$x_{2,1}$
$x_{2,2}$
Windows and metadata remain addressable
Runtime-native tools
Execute directly on the workspace
Slice
Transform
Analyze
Compact structured observations
Episodic memory
Signal key
Shape and statistical structure
Context key
Task and textual context
Retrieve a successful episode
Snowstorm
Demand ↑
Stored rationale and analytical trace
Experience-driven tool evolution
Add to the runtime tool set
Executed traces
Cluster recurring procedures
Candidate tool
Program + invocation description
Held-out tasks
Success rate exceeds threshold
Registered tool
Available to later episodes
