Open question	Controlled comparison			Evidence to record
Perception or execution	Model judgment	vs.	Numerical tool	Numerical error Execution cost
Memory under change	Release v_1 Prior evidence	→	Release v_2 Revised values	Revalidation Updated conclusions
Procedure transfer	Seen setting	vs.	Held-out setting	Held-out performance Reuse success
Evidence sensitivity	Evidence present	vs.	Evidence removed	Response to removal Grounded claims
Prediction to decision	Forecast	→	Inventory action	Forecast error Action utility

Match the backbone, information boundary and resource budget
